American Fork Hospital	127	251.97	192.99	**
Uintah Basin Medical Center	43	372.09	190.12	*

**Most Utah hospitals in this table did as well as expected compared to similar hospitals in the U.S.**

**The following hospitals treated at least one patient but fewer than 30 patients:**

Allen Memorial, Bear River Valley, Beaver Valley, Castlevue, Central Valley, Delta Community, Fillmore Community, Garfield Memorial, Gunnison Valley, Kane County, Mountain West San Juan, Sanpete Valley, and Sevier Valley

**Rating:**

*** Lower rate than expected (better)	** Same as expected	* Higher rate than expected
---------------------------------------	---------------------	-----------------------------

**Observed Rate:** number of women out of 1,000 who delivered a live baby and experienced this outcome.

**Expected rate:** number of patients out of 1,000 who were expected to experience this outcome at this hospital if it performed the same as other U.S. hospitals that treated similar patients (adjusted for mother's age and other conditions the mother has).

LDS Hospital	12,767	2.98	6.23	***

Note: Because birth injuries are quite rare, this table includes three years of data. Some birth injuries associated with this indicator might be minor or not preventable by hospital practitioners.

The definition of this indicator changed in late 2003. Prior to October 2003, "head molding" might have been included in the indicator. "Newborn head molding" is an abnormal head shape that occurs from pressure on the baby's head during delivery. This is not a serious condition and the baby's head often returns to its normal shape in a few days.

**More than half of Utah hospitals in this table (23 out of 38 or 61%) had fewer than expected birth injuries compared to similar hospitals in the U.S.**

## Rating:

*** Lower rate than expected (better)	** Same as expected	* Higher rate than expected
---------------------------------------	---------------------	-----------------------------

Observed Rate: percentage of newborns who experience an injury

Expected rate: percentage of babies who were expected to experience an injury at this hospital if it performed the same as other U.S. hospitals that delivered a similar ratio of males and female babies
